GroundSure Ground Stability

GroundSure Ground Stability is a risk screening report designed to provide a cost-effective overview on the potential for ground instability due to natural hazards or previous mineral extraction in the vicinity of the property.

Key Features

The report looks primarily at historical and contemporary information using data sets unique to GroundSure.

Ensure Your Clients Are Protected

GroundSure Environmental Consultants are available to discuss the findings of reports free of charge and thereafter have full capability to provide further consultancy support to ensure environmental risks are effectively and commercially managed to the best advantage of the client throughout the course of a transaction.

To view specimen reports please contact info@searchesuk.co.uk.
