Within the scope of this assessment, the Site is not considered to be at a significant risk of historic or present mineral extraction hazards, as detailed above. Mining hazards are unlikely to have an adverse effect on the security of the Site for normal lending purposes.

This Certificate does not consider the potential impact of planned/future mineral extraction or the development potential of the site. If you require further assurances on these risks, it is recommended you purchase TerraSearch® Assess.

TerraSearch® Assure is based upon Terrafirma's Geographical Information System (GIS) and extensive collection of abandoned mine plans, maps, records and archives.

The certificate is accepted by all major UK lenders and has been designed to provide an instant and expert certification that the Site will not be affected by historic or present mineral extraction hazards.

Terrafirma terms & conditions provide liability cover of £10m per certificate. All TerraSearch® reports adhere to The Search Code, monitored by the Property Code Compliance Board.

Report Limitations

This TerraSearch® Assure Certificate has been carried out with reference to TerraFirma's bespoke GIS and an extensive collection of abandoned mine plans, maps, records and archives in our possession. This report does not consider natural ground stability hazards, such as subsidence, landslip or coastal erosion.

From this material, we have endeavoured to provide as accurate a report as possible. It should be realised that totally unrecorded or unindicated workings can exist between known workings and therefore TerraFirma cannot be held responsible for any settlement or subsidence problems as a result of a Site being affected by unrecorded mining features or natural ground cavities.

It is a 'remote' investigation and reviews only information provided by the client and from the databases of publicly available information that have been chosen to enable a desk based environmental assessment of the Site. The Certificate does not include a Site Investigation, nor does TerraFirma make specific information requests of the regulatory authorities for any relevant information they may hold.

This report is concerned solely with the Site searched and should not be used in connection with adjacent properties as only relevant known mining features have been mentioned and any known features that could potentially have a direct influence upon the target Site. Other features which may be present in the general area may have been omitted for clarity.

This report is confidential to the client, the client's legal advisor and the client's Mortgage lender, as defined in the TerraSearch® terms & conditions, and as such may be used by them for conveyancing or related purposes. We have no liability toward any person or organisation not party to commissioning this report. This report or any part of it is not permitted to be reproduced, copied, altered or in any other way distributed by any other person or organisation.

Terms and Conditions

This report is provided under the TerraFirma Terms and Conditions for TerraSearch Reports, a copy of which is available on our website (www.minesearches.co.uk/about/termsandconditions). They provide a limit of liability per report of £10 million, backed by Professional Indemnity Insurance; details available on request.
