Applications

Classification Key

In this report, a traffic light system signifies identified potential risk levels. These are explained as follows:

No issues identified

Potential issues identified, proceed with caution

Issues identified, further action likely needed

For information purposes only

Summary

Residential Enviro + Climate Change + Planning Example Report

Contaminated Land		Flood Risk		Planning Constraints	
Active Landfill		Fluvial (undefended)		Sites of Special Scientific Interest	
Former Landfill		Pluvial		Ramsar	
Active Petrol or Fuel Stations		Tidal (undefended)		Nature Reserves	
Former Petrol or Fuel Stations		Groundwater		Listed Buildings	
Public Register of Contaminated Land		Flood Defences and Benefiting Areas		Scheduled Monuments	
Contaminated Land Designated as Special Sites		Flood Storage Areas		Certificates of Immunity	
Consented Discharges to Controlled Waters (with Conditions)		Historical Flood Areas		Ancient Woodland	
Environmental Pollution Incidents		Planning Constraints		Registered Parks and Gardens	
Manufacturing and Production of Industrial Products		Green Belt		World Heritage Sites	
Former Military Sites		Areas of Outstanding Natural Beauty		Open Access	
Regulated Sites		National Parks		Radon	
Historic Land Use		Special Areas of Conservation		Radon	
		Special Protection Areas			

Summary

Residential Enviro + Climate Change + Planning Example Report

Transportation		Ground Stability		Climate Change	
Overground Rail		Shrink-Swell Clays		Energy Performance Certificate (EPC)	
Overground Rail - Elizabeth Line		Running Sands		Heat Stress	
London Underground		Compressible Ground		Wildfire	
HS2		Collapsible Deposits		Drought	
HS2 Safeguarding Zones		Artificial Ground		Coastal Erosion Susceptibility	
Energy and Infrastructure		Dissolution of Soluble Rocks		Coastal Erosion Extent (Shoreline Management Plan)	
National Grid		Landslides		Coastal Erosion Extent (No Active Intervention)	
Petroleum Exploration and Development Licences		Coal Mining		Planning Applications	
Power Stations		Coal Authority - Coal Mining Reporting Area		Large Scale Developments	
Solar Renewable Energy Sites		Climate Change		Small Scale Developments	
Wind Renewable Energy Sites		Shrink Swell			
Other Renewable Energy Sites		Flooding			
COMAH Establishments					

Active Landfill

The property is more than 1 km from any active landfill site. The risk of water and soil contamination, or poor air quality from an active landfill site, is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Former Landfill

The property is more than 500 metres from any former landfill site. The risk of potential water and soil contamination, or poor air quality, arising from proximity to a former landfill site is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Active Petrol or Fuel Stations

The property is more than 20 metres from any active petrol or fuel station. The risk of potential water and soil contamination or ground gas emissions arising from proximity to an active petrol or fuel station is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Former Petrol or Fuel Stations

The property is more than 10 metres from any former petrol or fuel station. The risk of potential water and soil contamination, or ground gas emissions, arising from proximity to a former petrol or fuel station is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Public Register of Contaminated Land

The property is more than 250 metres from any site designated as contaminated land by the local authority. The risk of potential water and soil contamination, or poor air quality, arising from proximity to a site designated as contaminated land is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Contaminated Land Designated as Special Sites

The property is more than 250 metres from any Environment Agency-designated Special Site. The risk of potential water and soil contamination, or poor air quality, arising from proximity to a Special Site is likely low or very low. It is unlikely that any regulatory controls or future remediation actions would be mandated.

Captured at: 27/02/25 09:41 UTC

Consented Discharges to Controlled Waters (with Conditions)

The property is more than 50 metres from any site with licensed consent for discharging effluent into controlled waters. The risk of water contamination arising from proximity to a licensed discharge is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Environmental Pollution Incidents

The property is more than 50 metres from any significant pollution incident. The risk of water and soil contamination, or poor air quality, arising from reported pollution incidents is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Contaminated Land

Manufacturing and Production of Industrial Products

The property is more than 10 metres from any site licensed for industrial use of the land. The risk of potential water and soil contamination, or ground gas emissions, arising from proximity to a site of a site licensed for industrial land use is likely low or very low.

Captured at: 27/02/25 09:41 UTC

Former Military Sites

The property is more than 50 metres from any known former military site. The risk of potential water or soil contamination, poor air quality, or unexploded ordnance, is likely low or very low.

Captured at: 27/02/25 09:42 UTC

Regulated Sites

The property is not on or near any identified regulated sites. The risk of potential water and soil contamination, or poor air quality, arising from proximity to a regulated site is likely low or very low.

Captured at: 27/02/25 09:42 UTC

Historic Land Use

The property is more than 25 metres from any area of past industrial land use. The risk posed by contaminants, e.g. heavy metals, chemicals, or hydrocarbons, arising from former industrial land use is likely low or very low.

Captured at: 27/02/25 10:05 UTC

Information derived and reproduced with permission of the National Library of Scotland and Protonus Holdings - University of Oxford, Bodleian Library Map Collection.

Fluvial (undefended)

No river flood hazards have been identified at the property. Any risks to property or possessions arising from fluvial flooding are considered low or very low in likelihood and severity.

Captured at: 27/02/25 09:42 UTC

Pluvial

No surface water flood hazards have been identified at the property. Any risks to property or possessions arising from pluvial flooding are considered low or very low in likelihood and severity.

Captured at: 27/02/25 09:42 UTC

Tidal (undefended)

No tidal flood hazards have been identified at the property. Any risks to property or possessions arising from seawater flooding are considered low or very low in likelihood and severity.

Captured at: 27/02/25 09:42 UTC

Groundwater

No groundwater flood hazards have been identified at the property. Any risks to property or possessions arising from groundwater flooding are considered low or very low in likelihood and severity.

Captured at: 27/02/25 09:42 UTC

Flood Defences and Benefiting Areas

When a property is within an area benefiting from flood defences (ABFD), the risk of fluvial or tidal flooding could be significantly reduced, provided the defences are effectively maintained. The absence of ABFD does not necessarily mean the property is at risk from flooding.

Captured at: 27/02/25 09:42 UTC

Flood Storage Areas

The property is more than 250 metres away from an area which is used for flood water storage (balancing reservoir, storage basin or balancing pond). Any risk to property or possessions arising from overflowing flood storage areas are considered low or very low in likelihood and severity.

Captured at: 27/02/25 09:42 UTC

Historical Flood Areas

The property is more than 250 metres from an area with a history of flooding.

Captured at: 27/02/25 09:42 UTC

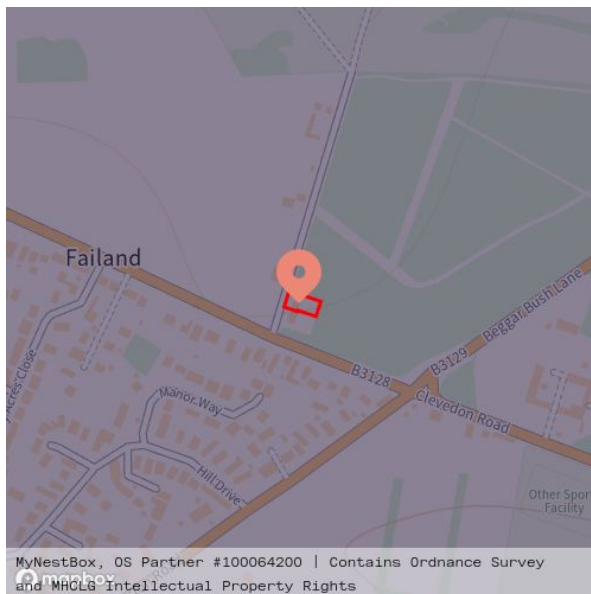

Planning Constraints

Green Belt

The property is within 250 metres of a designated green belt area. The risk of planning restrictions or other obligations on the property arising from proximity to a designated green belt area are likely elevated.

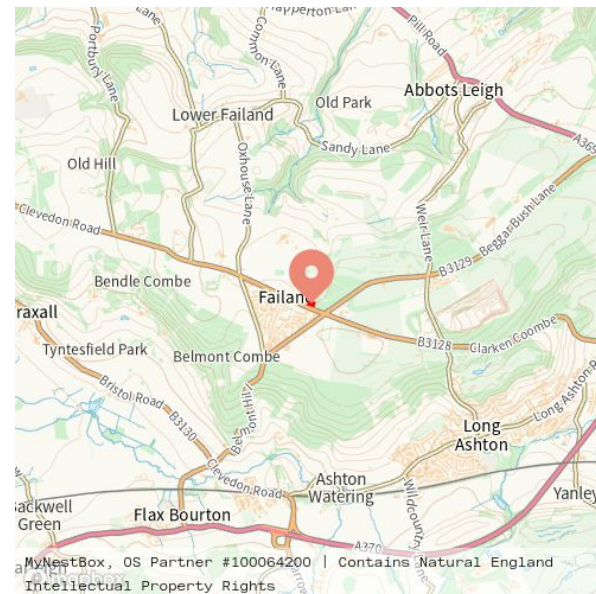

Captured at: 27/02/25 09:42 UTC

Areas of Outstanding Natural Beauty

The property is not within an Area of Outstanding Natural Beauty (AONB).

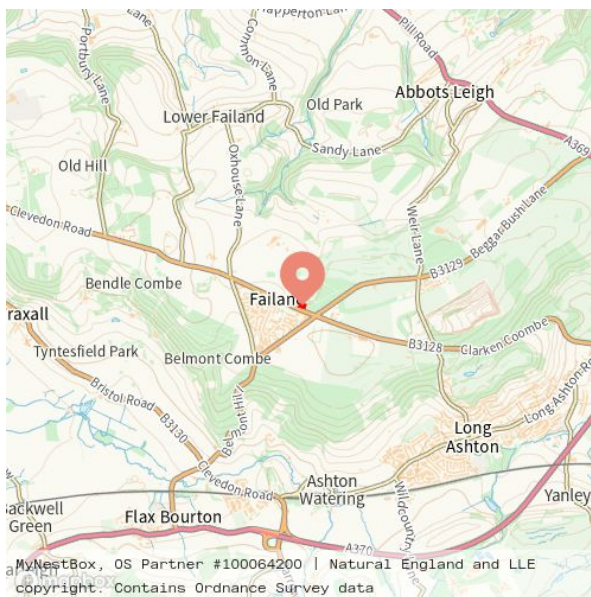

Captured at: 27/02/25 09:42 UTC

National Parks

The property is not within a national park. The risk of planning restrictions or other obligations arising from being within a national park are likely low or very low.

Captured at: 27/02/25 09:42 UTC

Special Areas of Conservation

The property is more than 250 metres from any Special Area of Conservation (SAC). The risks of planning restrictions or other obligations arising from proximity to an SAC are likely low or very low.

Captured at: 27/02/25 09:42 UTC

Special Protection Areas

The property is more than 250 metres from any Special Protection Area (SPA). The risk of planning restrictions arising from proximity to an SPA are likely low or very low.

Captured at: 27/02/25 09:42 UTC

Sites of Special Scientific Interest

The property is more than 250 metres from any Site of Special Scientific Interest (SSSI). The risks of planning restrictions or other obligations arising from proximity to an SSSI are likely low or very low.

Captured at: 27/02/25 09:42 UTC

Ramsar

The property is more than 250 metres from any Ramsar site. The risk of planning restrictions or other obligations arising from proximity to a Ramsar site are likely low or very low.

Captured at: 27/02/25 09:42 UTC

Nature Reserves

The property is more than 250 metres from any local or national nature reserve. The risk of planning restrictions or other obligations arising from proximity to a nature reserve are low or very low.

Captured at: 27/02/25 09:42 UTC

Listed Buildings

The property is more than 250 metres from any listed building. The risk of planning restrictions or other obligations arising from proximity to a listed building are likely low or very low.

Captured at: 27/02/25 09:42 UTC

Scheduled Monuments

The property is more than 250 metres from any scheduled monument. The risks or planning restrictions or other obligations arising from proximity to a scheduled monument are likely low or very low.

Captured at: 27/02/25 09:43 UTC

Certificates of Immunity

A Certificate of Immunity (COI) allows specific alterations without violating planning regulations, typically for listed buildings or structures with historical significance.

Captured at: 27/02/25 09:43 UTC

Ancient Woodland

The property is more than 250 metres from an ancient woodland. Structural risks to the property or planning restrictions on the property arising from proximity to an area of ancient woodland are likely low or very low.

Captured at: 27/02/25 09:43 UTC

Registered Parks and Gardens

The property is more than 250 metres from any registered park or garden. The risks of planning restrictions or other obligations arising from proximity to a registered park or garden are likely low or very low.

Captured at: 27/02/25 09:43 UTC

World Heritage Sites

The property is more than 250 metres from any World Heritage Site. The risks of planning restrictions or other obligations arising from proximity to a World Heritage Site are likely low or very low.

Captured at: 27/02/25 09:43 UTC

Open Access

The property is not within an area designated as common land or open country. The risk of issues relating to access, maintenance or other restrictions arising from the property being in an open access area are likely low or very low.

Captured at: 27/02/25 09:43 UTC

Radon

The property is in a Radon Affected Area where 10% to 30% of buildings are estimated to be at or above the Action Level. The risk of health implications or planning restrictions arising from radon exposure are likely elevated.

Captured at: 27/02/25 09:41 UTC

Database Right UKRI. All rights reserved.

Overground Rail

The property is more than 250 metres from any railway station or track. Impact on building structures from prolonged exposure to vibrations is likely low or very low.

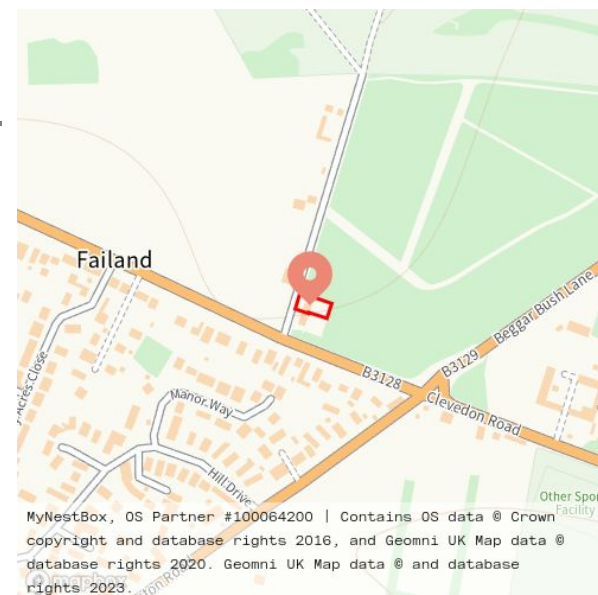

Captured at: 27/02/25 09:43 UTC

Overground Rail - Elizabeth Line

The property is more than 250 metres from any railway station or track along the Elizabeth Line. Impact on building structures from prolonged exposure to vibrations is likely low or very low.

Captured at: 27/02/25 09:43 UTC

London Underground

The property is more than 250 metres from any London Underground station or track. Impact on building structures from prolonged exposure to vibrations is likely low or very low.

Captured at: 27/02/25 09:43 UTC

HS2

The property is more than 300 metres from any proposed HS2 station or route. Impact on building structures from prolonged exposure to vibrations is likely low or very low.

Captured at: 27/02/25 09:43 UTC

HS2 Safeguarding Zones

The property is not within a HS2 Safeguarding Zone. The risk of the property being subject to restrictions and potential compulsory purchase orders is low or very low.

Captured at: 27/02/25 09:43 UTC

National Grid

The property is more than 100 metres from the nearest National Grid cable, overhead line, substation or tower used in high voltage (above 132kV) electricity transmission. Any risks associated with increased exposure to electromagnetic fields, or issues with access, are likely low or very low.

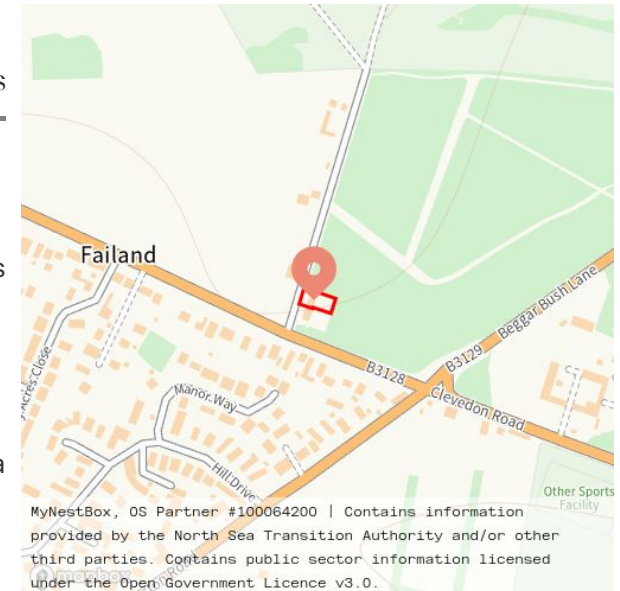

Captured at: 27/02/25 09:43 UTC

Petroleum Exploration and Development Licences

The property is more than 250 metres from any area where oil and gas exploration or production is licensed. The risk of potential water and soil contamination, or poor air quality, arising from proximity to a licenced area is likely low or very low.

Captured at: 27/02/25 09:43 UTC

Power Stations

The property is more than 250 metres from any power station, including nuclear power stations. The risks associated with poor air quality, thermal pollution or other contamination arising from proximity to a power station are likely low or very low.

Captured at: 27/02/25 09:43 UTC

Solar Renewable Energy Sites

The property is more than 1 km from any current or proposed solar energy generation site. The risks of the property value being impacted or land use change restrictions being imposed due to proximity to a renewable energy site are likely low or very low.

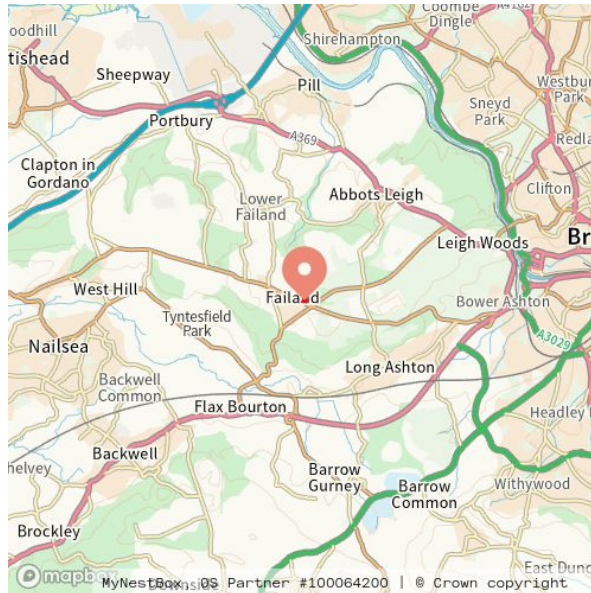

Captured at: 27/02/25 09:43 UTC

Wind Renewable Energy Sites

The property is more than 5 km from any current or proposed wind energy generation site. The risks of the property value being impacted or land use change restrictions being imposed due to proximity to a renewable energy site are likely low or very low.

Captured at: 27/02/25 09:43 UTC

Other Renewable Energy Sites

The property is more than 1 km from any current or proposed renewable energy site, excluding solar and wind. The risks of the property value being impacted or land use change restrictions being imposed due to proximity to a renewable energy site are likely low or very low.

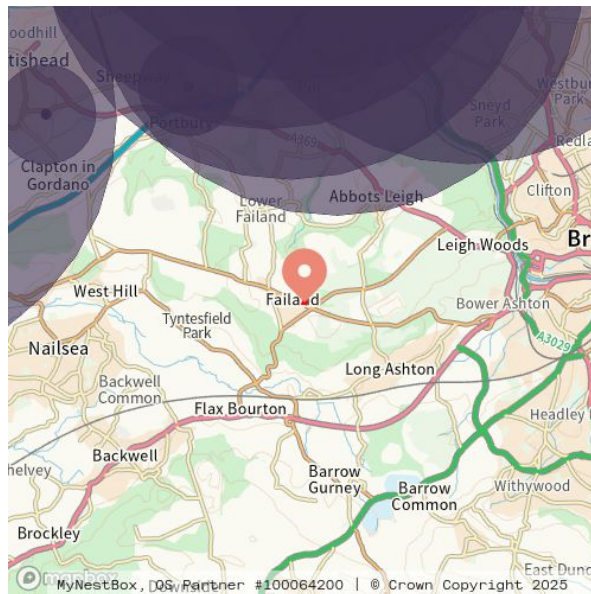

Captured at: 27/02/25 09:43 UTC

COMAH Establishments

The property is not within 5 km of any upper-tier COMAH site or within 1 km of any lower-tier COMAH site. The risk of impact in the event of an accident is likely low or very low.

Captured at: 27/02/25 09:44 UTC

Shrink-Swell Clays

The ground at the property is either non-plastic or has low plasticity, meaning the risk of ground movement due to shrink-swell clays is low to very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.
All rights reserved.

Compressible Ground

There are no significant signs of compressible ground at the property. The risk of issues related to changes in ground conditions, such as water levels or building loads, is considered low to very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.
All rights reserved.

Running Sands

There is no or very low potential for running sand issues at the property. The risk of ground instability caused by leaks, heavy rainfall, or flooding is low to very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.
All rights reserved.

Collapsible Deposits

There are no or very low signs of collapsible deposits at the property. The risk of ground stability, water infiltration, or structural stability issues due to collapsible deposits is expected to be low to very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.
All rights reserved.

Artificial Ground

There is no artificial ground recorded at the property based on available data, though some artificial ground of limited thickness is common in built-up areas. The risk of any ground stability or structural issues related to artificial ground is considered low to very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.
All rights reserved.

Landslides

There are no indicators for slope instability identified at the property. The risk of landslides due to changes in ground conditions, such as drainage alterations or excavation, is low to very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.
All rights reserved.

Dissolution of Soluble Rocks

Soluble rocks are likely present at the property. The risk of natural subsidence arising from high water flow, either at the surface or underground, is likely elevated.

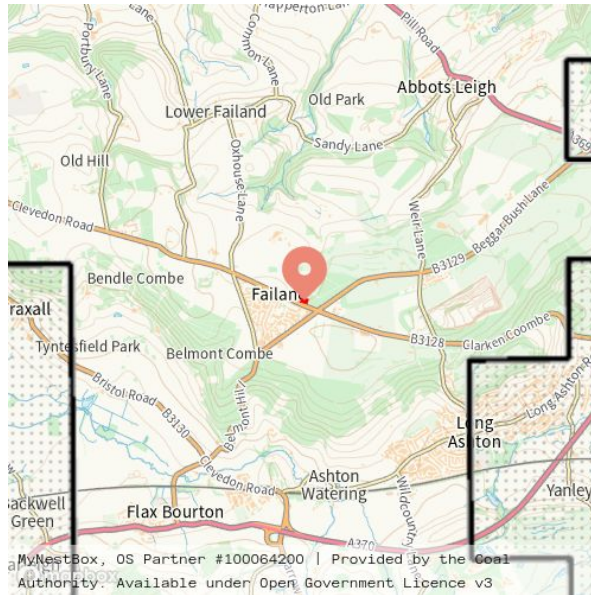

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No.
DRA/MNB/MAY2023 British Geological Survey @ UKRI.

Coal Authority - Coal Mining Reporting Area

This map illustrates the Coal Mining Reporting Areas. The property is not in a Coal Authority Coal Mining Reporting Area.

Captured at: 27/02/25 10:06 UTC

Shrink Swell

The property is situated in an area where climate change is expected to have a low or very low impact on potential future increases in Shrink Swell hazard during the term of a typical 35 year mortgage.

Near-Term

RCP 8.5 · 2030s · 50th Percentile

NO CHANGE

Mid-Term

RCP 8.5 · 2070s · 50th Percentile

Energy Performance Certificate (EPC)

The property's Energy Performance Certificate (EPC), as required by UK government legislation, provides a standardised energy rating that confirms the property's current energy efficiency and includes recommendations for possible retrofits. To view the energy rating and suggested retrofits for this property, visit [Find an energy certificate](#).

Captured at: 27/02/25 09:41 UTC

Flooding

The property is situated in an area where climate change is expected to have a low or very low impact on potential future increases in Flooding hazard during the term of a typical 35 year mortgage.

Near-Term

RCP 4.5 · 2030s

NO CHANGE

Mid-Term

Captured at: 27/02/25 09:41 UTC

Heat Stress

The property is in an area classified with 'medium' or 'high' heat hazard, meaning it generally stays hotter than surrounding areas. As a result, the risk of high heat stress during heatwaves is likely elevated.

Captured at: 27/02/25 09:44 UTC

Wildfire

The property is in an area classified with 'medium' or 'high' wildfire hazard as it is near land cover types that are more susceptible to wildfires than surrounding areas. As a result, the risk of wildfire during heatwaves is likely elevated.

Captured at: 27/02/25 09:44 UTC

Drought

The property is in an area classified with 'medium' or 'high' drought hazard meaning it is more at risk from reduced access to water and drier soil conditions. As a result, the risk of drought during heatwaves is likely elevated.

Captured at: 27/02/25 09:44 UTC

Coastal Erosion Susceptibility

The property is located in an area with a low risk of coastal erosion. This suggests that either the property is situated near a cliff with low susceptibility to erosion, or it is more than 2 km from the coastline or the nearest cliff section. The risk to the property's structural integrity from coastal erosion, including potential impacts from climate change, is expected to be low or very low.

Captured at: 27/02/25 09:41 UTC

Derived from BGS Digital Data under Licence No. DRA/MNB/MAY2023 British Geological Survey © UKRI. All rights reserved.

Coastal Erosion Extent (Shoreline Management Plan)

The property is situated in an area where, given the currently proposed shoreline management plan, climate change projections indicate a low amount of coastal erosion relative to the current coastline during the term of a typical 35-year mortgage.

Captured at: 27/02/25 09:41 UTC

Small Scale Developments

Small Scale Developments includes relevant planning applications categorised as either small or medium. Small planning applications are proposals for things like an extension to or renovation of a single dwelling. Medium planning applications are proposals concerning 2-5 dwellings. Small infrastructure projects, such as mobile phone masts or small scale (<150kw) renewable energy projects, are also included.

Reference	Authority	Description	Stage	Within

Important Consumer Protection Information

This search has been produced by MyNestBox Limited (trading as Martello), 3 Wraxall Piece, Green Lane, Failand, Bristol, BS8 3TW, hello@martello.app which is registered with the Property Codes Compliance Board (PCCB) as a subscriber to the Search Code. The PCCB independently monitors how registered search firms maintain compliance with the Code.

Purpose of This Report

This is a residential environment report, all of our findings assume that this property is being purchased as a residential property with no agricultural use or planned change of use or significant alterations to the property.

Flood Re Scheme

Flood Re is a government initiative aimed at making flood insurance more accessible and affordable for homeowners in flood-prone areas. If a property is at high risk of flooding, insurers may transfer the flood risk part of the policy to Flood Re, ensuring that coverage remains available and affordable even after a flood event. However, eligibility for Flood Re is limited whereby properties built after 1 January 2009, certain buy-to-let homes, and those with more than four residential units do not qualify. Additionally, not all insurers work with Flood Re, so it's important to review options from different providers to ensure flood cover is included. For full eligibility details, please visit the [Flood Re website](#).

BGS Disclaimer

Some of the responses contained herein are based on data and information provided by the United Kingdom Research and Innovation (UKRI) or its component body the British Geological Survey (BGS). Your use of any information contained herein which is derived from or based upon such data and information is at your own risk. Report Sign Off Statement

I have reviewed the data, methodology and quality of Martello's Environmental Report and I hereby certify that it meets the requirements of PCCB Compliance Notes on Environmental Reports and Flooding, and The Law Society Practice Notes on Land Contamination, Flooding and Climate Change. It offers a unique approach to analysing and presenting risk in a variety of formats for different audiences.

Chris Taylor, BSc.Hons, MSc, AIEMA, SiLC, C.WEM, Registered Auditor

Important Consumer Protection Information

About Planning Applications Data

The planning datasets provide a robust representation of the planning application history around the property. We use several data providers, including LandHawk, Planning Pipe, and manual checks of Local Authority portals, to confirm accuracy. However, our data reflects the status at the time of this report's production, as the planning application process is dynamic and subject to change.

If your property purchase relies on planning proposals in the local area that may impact your decision to buy, we recommend contacting the Planning Department at the relevant Local Authority to stay updated on proposed developments.

While we strive to ensure the accuracy and completeness of the data obtained from third-party providers, Martello cannot guarantee that such data is free from errors, omissions, or inaccuracies. However, should you have concerns or issues related to the planning data included in this report, we are committed to assisting you.

Though Martello shall not be liable for losses or damages incurred by the client or beneficiary arising from third-party data inaccuracies, if you have any queries or concerns with any of the data in this report please contact support@martello.app and we will ensure that the matter is resolved appropriately and to your satisfaction.

Important Consumer Protection Information

The Search Code

- Provides protection for homebuyers, sellers, estate agents, conveyancers and mortgage lenders who rely on the information included in property search reports undertaken by subscribers on residential and commercial property within the United Kingdom.
- Sets out minimum standards which firms compiling and selling search reports must meet.
- Promotes the best practice and quality standards within the industry for the benefit of consumers and property professionals.
- Enables consumers and property professionals to have confidence in firms which subscribe to the code, their products and services.

By giving you this information, MyNestBox Limited (trading as Martello) is confirming that they keep to the principles of the Code. This provides important protection for you.

The Code's Core Principles

Firms which subscribe to the Search Code will:

- Display the Search Code logo prominently on their search reports.
- Act with integrity and carry out work with due skill, care and diligence.
- At all times maintain adequate and appropriate insurance to protect consumers.
- Conduct business in an honest, fair and professional manner.
- Handle complaints speedily and fairly.
- ensure that products and services comply with industry registration rules and standards and relevant laws.
- Monitor their compliance with the Code.

Complaints Procedure

MyNestBox Limited (trading as Martello) is registered with the Property Codes Compliance Board as a subscriber to the Search Code. A key commitment under the Code is that firms will handle any complaints both speedily and fairly. If you want to make a complaint, we will:

- Acknowledge it within 5 working days of receipt.
- Normally deal with it fully and provide a final response, in writing, within 20 working days of receipt.
- Keep you informed by letter, telephone or e-mail, as you prefer if we need more time.
- Provide a final response, in writing, at the latest within 40 working days of receipt.
- Liaise, at your request, with anyone acting formally on your behalf.

If you are not satisfied with our final response, or if we exceed the response timescales, you may refer the complaint to The Property Ombudsman scheme (TPOs): Tel: 01722 333306, <https://www.tpos.co.uk> email: admin@tpos.co.uk

We will co-operate fully with the Ombudsman during an investigation and comply with his final decision.

Complaints should be sent to:

Rob Crosby

Central Services Administrator

MyNestBox Limited
